

The Grey Record

1 December 2023 – 29 November 2024

The information in this Grey Record is true and complete to the best of The Society's knowledge. If you are aware of any errors please let the Governance and Risk Manager know by email: governance@physoc.org

Grey Record 2023 – 2024

About The Physiological Society

As the largest network of physiologists in Europe, with academic journals of global reach, we continue a nearly 150 year tradition of being at the forefront of the life sciences.

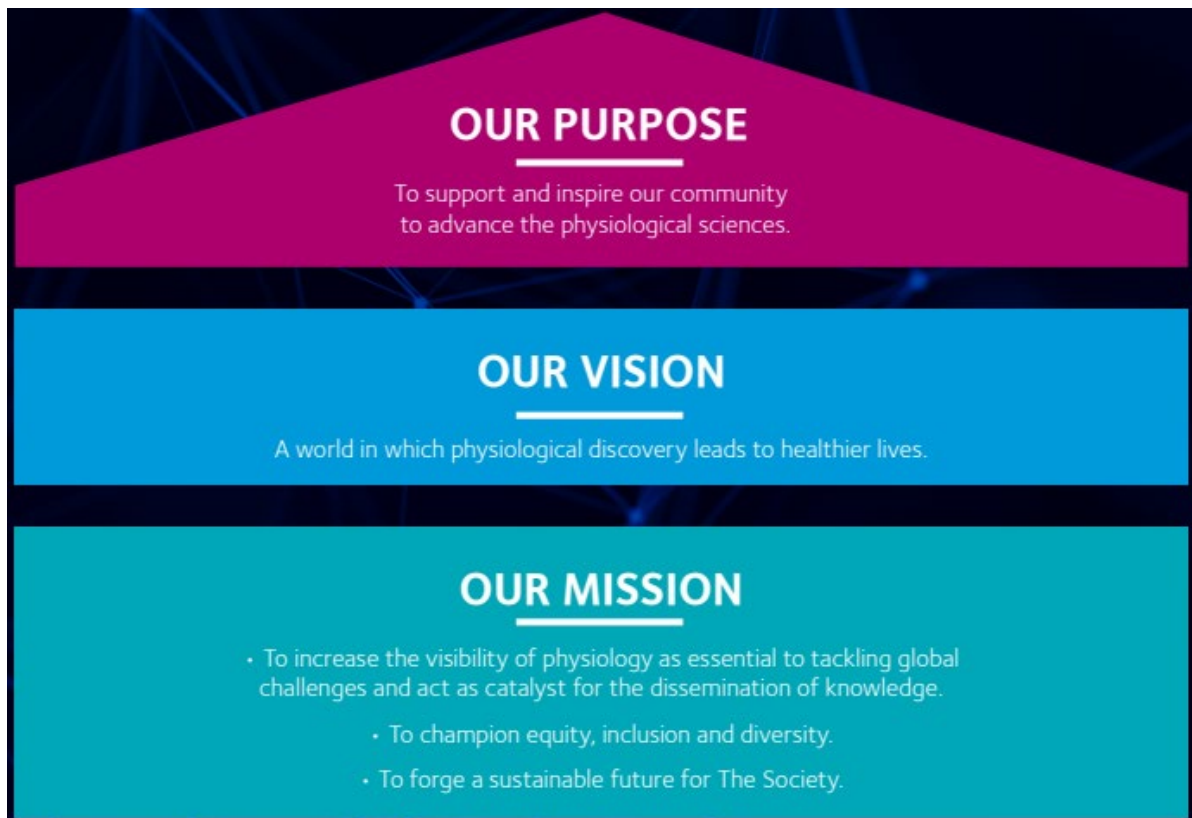

Offices of The Physiological Society

Correspondence and enquiries should be directed to the offices of The Society:

The Physiological Society
Hodgkin Huxley House
30 Farringdon Lane
London EC1R 3AW

Tel: +44 (0) 20 7269 5710
Email: membership@physoc.org
Website: www.physoc.org

Strategy 2023 – 27:

Board of Trustees

Trustees are legally responsible for the overall governance, management and policy of The Society, ensuring the charitable objectives for which it has been set up are met. The Trustees are also the Directors of The Society. Trustees are elected to serve a period of four years and any voting Member is eligible to stand. Meetings of the Board are chaired by the President.

Honorary Officers

Honorary Fellows 2024

We award Honorary Fellowship to persons of distinction in science who have contributed to the advancement of physiology. To see all The Society's Honorary Fellows please visit: <https://www.physoc.org/join/honorary-fellows/>

Professor Donald M. Bers, Ph.D.

Donald Bers is Distinguished Professor and Chair of the Department of Pharmacology at the University of California, Davis School of Medicine (since 2008). He also holds the Joseph Silva Chair for Cardiovascular Research and is Director of the Cardiovascular Research Institute at UC Davis. He graduated from the University of Colorado, Boulder (1974) and did Ph.D. studies in Physiology at UCLA in 1978, followed by postdoctoral study at the University of Edinburgh, Scotland (1979-80). He returned to UCLA and then as an Assistant Professor at UC Riverside (1982) where he rose to Professor and Associate Dean of Biomedical Sciences. He was recruited in 1992 to Loyola University Chicago as Chair of Physiology, and De-Pauw Endowed Chair in Cardiovascular Research, where he rebuilt a strong collaborative research program. In 2008 he moved to his current position at UC Davis where he also rebuilt a department as a highly collaborative, productive and diverse research faculty. Oxford University also selected him as the Newton-Abraham Professor in 2019, spending six months back in the UK.

His research has focused on cardiac Na and Ca transport, electrophysiology, CaM, CaMKII and adrenergic signaling, E-C coupling, myofilament activation, mitochondrial Ca/energetics, GPCR signaling, and contractile dysfunction and arrhythmogenesis in heart failure and diabetes. His group also creates detailed computational models of ion transport, electrophysiology and signaling that integrate these properties to enhance quantitative mechanistic understanding of physiological and pathological function. Dr Bers has a productive publications track record (>550 papers), h-index=141 (>75,000 citations) and strong NIH grant funding for >40 years. This has led to over 700 symposium and seminar presentations around the world and his recruitment to numerous editorial boards (including Senior Editor for *The Journal of Physiology* 2011-21) and extensive grant review service for numerous agencies. He has been an effective leader of large research groups (e.g. a 10-year NIH Program Project Grant and as Chair of academic departments at three Universities. He has trained >100 Ph.D. students, postdocs and junior faculty (~50% female and from 34 countries) and among his numerous honours, was awarded the Eric N. Olson Mentoring Award from the International Society for Heart Research in 2023.

Professor Catherine Ross CSci, CBiol, FRSB, FAHCS, FESC, FRCPath (Hon.)

Catherine Ross is the Chief Scientific Officer for Scotland, Scottish Government's most senior clinical advisor for Healthcare Science professional issues, and head of profession for the scientific workforce within the NHS in Scotland. She provides expert professional advice to Scottish Ministers and Policy Officials and leadership for all aspects of policy which impact on the scientific workforce including education, research and clinical practice.

Catherine is a Chartered Scientist and Chartered Biologist and is a Fellow of the Royal Society of Biology, the National Institute of Prevention and Cardiovascular Health in Ireland and the European Society of Cardiology, and Honorary Fellow of the Royal College of Pathologists and the Academy for Healthcare science. She is a Visiting Professor at Edinburgh Napier University, Manchester Metropolitan University,

Ulster University and Honorary Research Consultant in NHS Lothian. Catherine is a non-executive director of the Belfast Health and Social Care Trust, Northern Ireland's largest health trust.

Catherine holds a number of senior leadership positions Nationally and Internationally. She is the current President of the Science Council, the awarding body of Chartership in Science, having previously held the role of Vice-Chair of the Board and Chair of the Policy Advisory Committee. She has previously served as the President of the Professional Body for Cardiac Scientists. Catherine is currently a Board member of the Association of Cardiovascular Nursing and Allied Professions within the European Society of Cardiology (ESC) and is the Chair of Allied Professionals National Societies Committee and Chair of the European Society of Cardiology Taskforce on Allied Professionals. She represents Scotland on the International Federation of Medical and Biological Engineering (IFMBE) Board and is a member of the International (IFMBE) scientific programme committee. In recognition of her work supporting women leaders has been an invited delegate for the UK UN Women delegation on the UN Commission on the Status of Women.

Committees – Advisory

The Board has committees to which it delegates powers, and these groups report back to the Board.

Prize Lectures

We award a number of prize lectures each year in recognition of outstanding contributions to physiology. These prize lectures play an important role in our commitment to advancing and promoting the physiological sciences.

Annual Review Prize Lecture

Lucilla Poston CBE, King's College London, UK

Bayliss-Starling Prize Lecture

Mootaz Salman BPharm MSc PhD, University of Oxford, UK

GL Brown Prize Lecture

Damian Bailey PhD, University of South Wales, UK

Hodgkin-Huxley Prize Lecture

Natalia A. Trayanova PhD MS, Johns Hopkins University, Baltimore, Maryland, U.S.

Otto Hutter Physiology Teaching Prize Lecture

Matthew J. Mason PhD, University of Cambridge, UK

President's Lecture

Nessa Carey

R Jean Banister Prize Lecture

Sylvia Schröder PhD, University of Sussex (UK)

Sharpey-Schafer Prize Lecture

Michael J. Welsh MD, University of Iowa, Iowa City, Iowa, U.S.

Staff of The Physiological Society

The Society is managed on a daily basis by a team of staff based at our Head Office in London.
